

SCHOOL OF BLESSING
MODULE 1 PART 1 - MARVELS
OF HUMAN CREATION

CHAPTER 01

The Different Stages of Creation

Module 1 Part 1 - Marvels of Human Creation

Chapter 01 - The Different Stages of Creation

Welcome and Warning

Welcome to the first session of the School of Blessing Seminar! We are going to cover a lot of ground in this seminar. I am going to pack what I have learned in the last 40 years into 12 sessions.

Because of this I do **not** expect you to remember everything I teach. If you have heard it before you might remember it, but do not try and remember everything I teach. I want you to remember only the parts that hit you.

I suggest you make a note of whatever stands out to you. Whatever God challenges you on or whatever you learned that you didn't know before that you need to take away with you from this seminar, remember that because you won't be able to remember everything.

You will have the manual to go back and read everything that I have covered. The chances are though that you still won't remember everything.

You will probably come back for a future seminar again to try and learn some more, because then you will be more ready to learn some of what we are going to cover. This is because most of the things we learn are progressive.

We build on previous knowledge. So you may not be at the point to actually receive some of the knowledge I am going to give you, although I am going to give it so simply that anybody should be able to understand it.

This has nothing to do with your intelligence. I just don't want you to get caught in a syndrome of thinking,

"I need to grab everything that is here and remember it."

Do not do this because you won't remember everything.

The Creation

Let's start then right at the beginning which is the creation.

I have taught on this elsewhere and you may have studied some of it. You may have heard some of what I am going to teach you before, but I hope you are going to learn it in a slightly different way.

When God created the worlds and everything that is in it, He created it in four stages. It is very important that you understand this, so that you understand how He made us and how we function.

All that we are going to cover in this first module is foundational. It is so that we can understand how God made us, how we are supposed to function, and how God planned for us to live.

After this we are going to realize that we are not living that way, and we will find out why this is the case. We are going to find out exactly what went wrong, what continues to go wrong in our lives, and how we can fix it.

So I expect you to be challenged and liberated and given something you never had before.

4 Stages of Creation

Example: Creation Stage 1

This is what the Scripture says concerning the first stage of creation,

In the beginning God made the heavens and the earth.

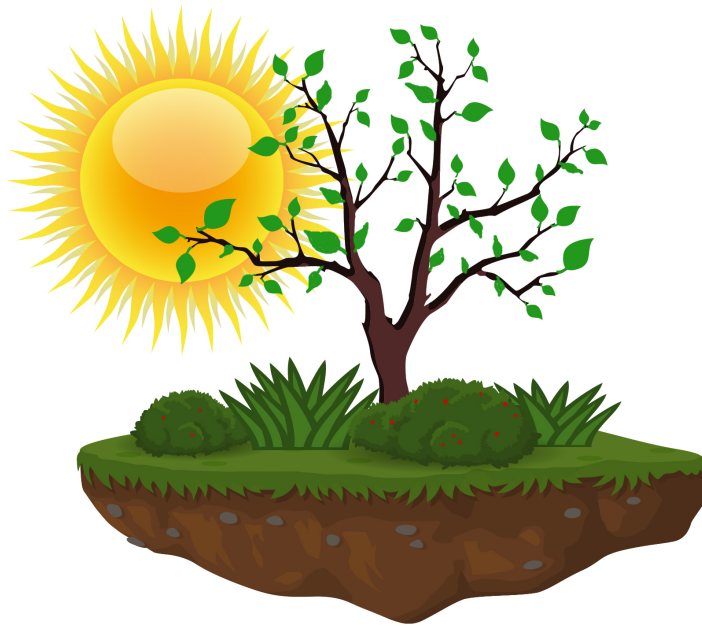

Everything we see that is tangible and physical was created in that creation. Prior to that creation there was only the Spirit of God. The only thing that existed was God who was Spirit. And so God took Spirit and made matter out of it.

Scientists have studied matter and discovered that there are various different components which they call the elements. If you are intelligent and have

studied a bit of science and chemistry, you have probably learned about the Periodic Table, which is a list of all the elements that they have discovered.

Here is something amazing. When they sent a rocket up to the moon and to Mars and they studied the materials of those planets, they discovered it was made of the same substances that the earth is made of.

Example: Creation Stage 2

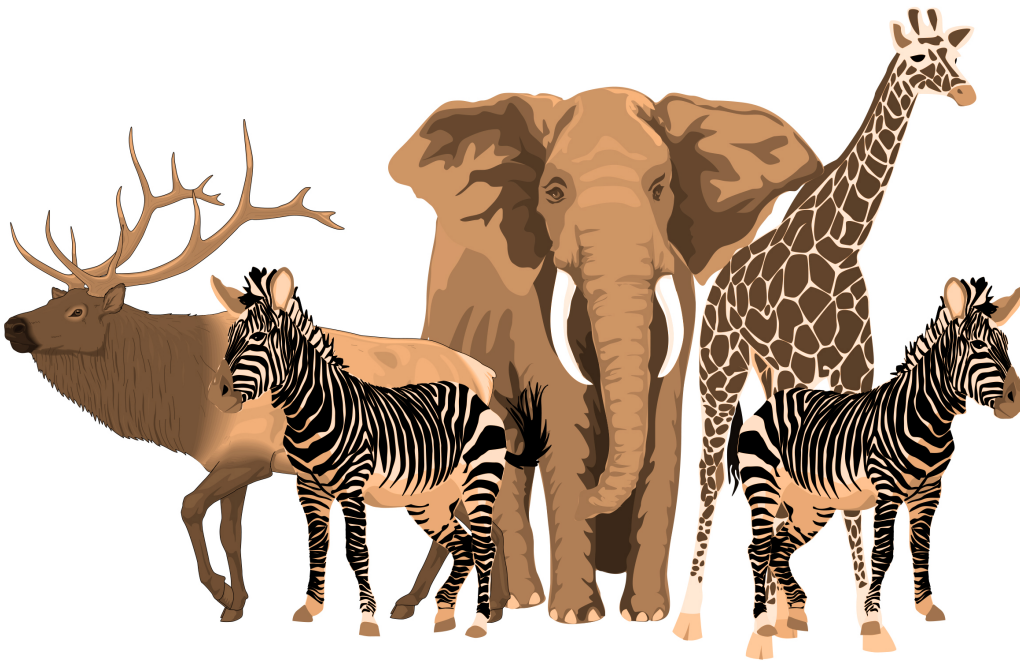

The entire universe is made up of the same substances. That first stage of creation is made up of matter, but it doesn't have life in it. It is just chemicals, materials and elements.

So God made a second stage of creation. He took that matter and put life into it, and the first life form that appeared on the earth was plant life.

A plant is made up of matter. If you broke down the elements in a plant, you would discover some of the elements in the Periodic Table. But plants have something that ordinary dust doesn't have. Plants have life.

We call that life **biological life**. If you have ever studied biology, you have studied biological life. This is the life that is common to every created thing. Biological life has certain functions that are built into it. We will look in that in more detail specifically as it relates to us.

Example: Creation Stage 3

In the third stage of creation, God created the animals which include insects and creepy crawly things, and He added a new kind of life. He added **psychological life**.

Animals have bodies, that as you have probably guessed, are made up of the stuff of the earth. They are made up of the same materials and chemicals.

Animals have biological life in their bodies just like a plant does. But animals have one additional form of life which we call psychological life. It comes from the Greek word *psuche* which in the Scriptures is translated as *soul*.

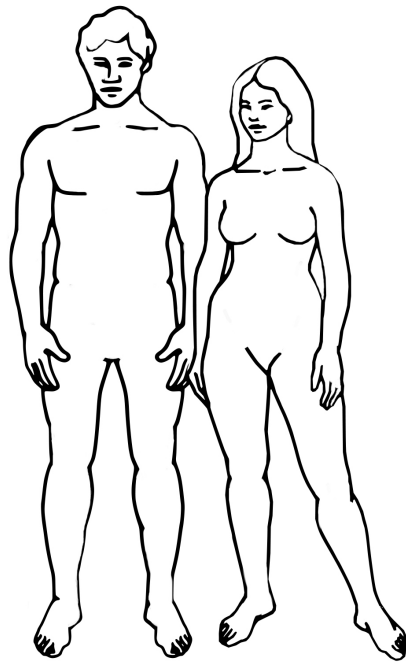

Animals have a soul, and a soul can do things that biological life cannot do. Animals can do things that plants cannot do.

Example: Creation Stage 4

God then made a fourth stage of creation which was mankind. Scientists haven't yet figured out the difference between an animal and a man, except that he is more intelligent.

They have come up with the stupid idea that we evolved from lower life forms. This is because they have not understand that God added another kind of life when He created man. It is something that neither the plants nor the animals have.

God created **spiritual life** in man.

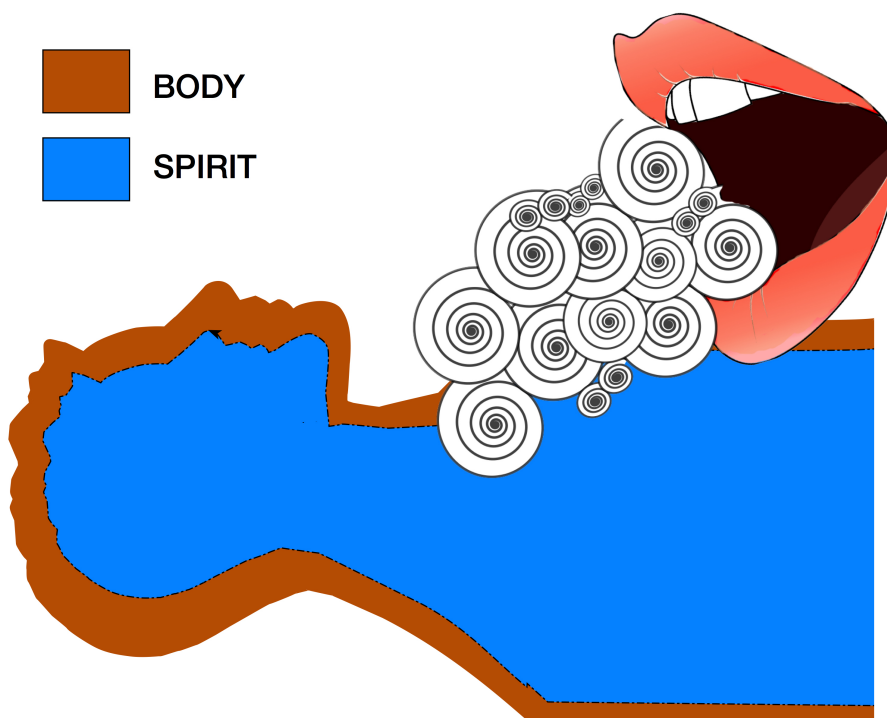

How God Made Man

Let's look at how God made man. He made man very different to the way He made the plants and the animals.

When God created the heavens and the earth, He said, *Let there be...* and there was. He said, *Let there be plants*, and there were plants. He said, *Let there be life; birds, fish and animals*, and there was. But He didn't say, *Let there be man*, and there was man.

Example: Man Receiving Spirit

God did something very special when it came to creating man. He made man's body once again out of the dust of the earth. Then He opened His mouth and breathed life into that body.

That body then stood up as a new being, containing biological life, psychological life and spiritual life.

That little bit of knowledge alone will destroy every argument of evolution, because there is a big gap between each one of those creations.

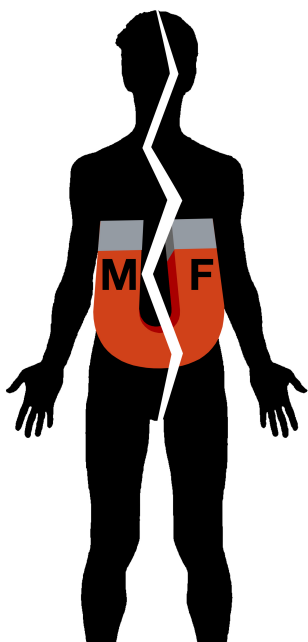

How God Created Woman

God created His ultimate creation which was man. But there was something better that was coming. God had a look at man and said,

"I'm sure I could improve this a bit."

I know if you are a lady you are thinking that. Sometimes us guys agree that He did a beautiful job.

Example: Creation of Woman

How did God create woman? He did not create her the same way He created Adam. He did an operation on Adam. You see when God created Adam, he was neither male nor female. He was actually both.

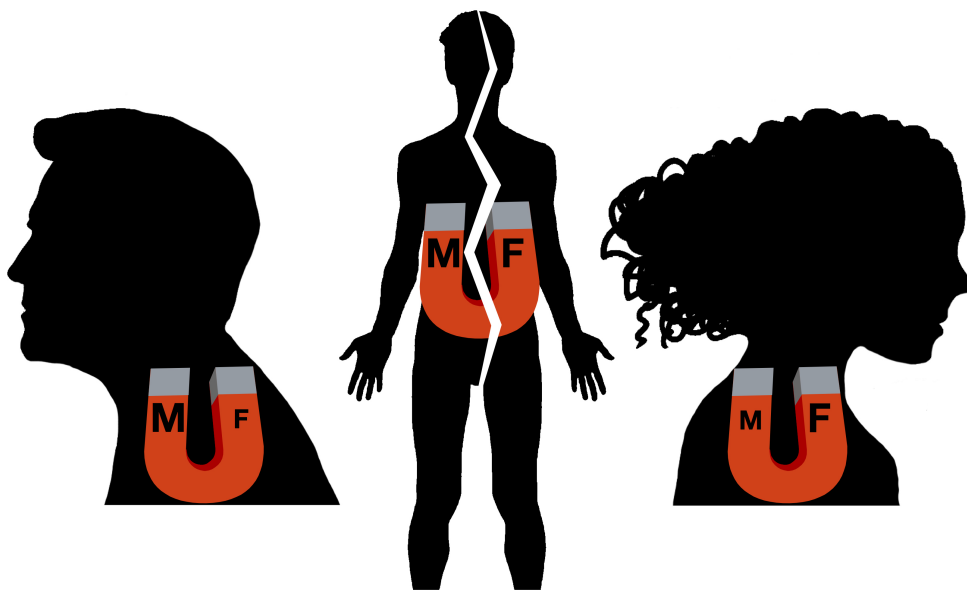

The Scripture says that God created Adam male and female. Did you know that? Adam had both genders in him, because he was made in the image of God and God has no gender.

This is contrary to the Feminist Movement, who want to change the Bible to say, *Our mother who art in heaven*.

Why do we say, *Our father...*? Because within masculinity is contained femininity. And when God made Adam, in his masculinity was also the femininity. The two were together in one person.

So when God came to create woman, what He did was to split Adam in half. He took a side of him out. The Hebrew text says that God took a rib out of Adam, but that word rib can be translated as side.

Example: Man and Woman Separated

God took half of Adam out, and out of that He created another being which He called woman. The amazing thing was Adam still had the masculine and feminine gender, but the masculine dominated. The woman that God made also had masculine and feminine, but the feminine dominated.

That is the way God has made us. I want you to understand this, especially as we begin to look later on at relationships and sexuality.

When we get to this part, I am going to explain to you what causes all the problems with sexuality. I will show you what causes LGBT and all the

perversions and weird things that take place. It is all because of how God created us.
